System*** – Combining
the history of astronomy
with the latest advances
in space age technolo-
gies, this exciting color-
ing book also joins fun
with facts about space
exploration and our solar
system. 40361-0 \$3.95

***History of Space Ex-
ploration*** – Travel to
the frontiers of space
with this impressive,
fact-filled book that
invites children to learn
about one of mankind’s
most extraordinary
quests. 26152-2 \$3.95

***International Space
Station*** – 42379-4 \$3.95
(not shown)

Felts

Solar System – 30 pieces, 9 planets, solar and lunar eclipse, earth core, shuttle, lander, and astronauts – **\$14.95**

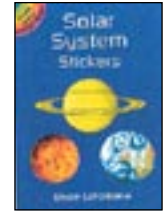

See the science lessons for grades 2-8 about the universe, galaxies, stars, and space exploration

depicting rockets and spacecraft important in the history of space flight. 40309-2 **\$1.50**

Solar System – Here you will find the sun, all the planets in our solar system, moons, asteroids, and a comet. 40308-4 **\$1.50**

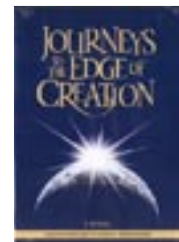

Night Sky – Glow-in-the-dark – The night sky can reveal planets, stars, and other celestial masses that are normally hidden during the day. 12 of them are found here in glow-in-the-dark stickers. 44915-7 **\$1.50**

DVDs

Journeys to the Edge of Creation – Take a look at the universe and our solar system. **\$14.99** (2 DVD set)

Stickers

Spacecraft – Included in this book are 18 well-researched stickers

“Behold the glories of the firmament.
Look up to the gems of light which
like precious gold stud the heavens....
Cannot He who spread above us this glorious canopy, who,
if the sun, moon, and stars were swept away
could call them again into existence in a moment,
requite His faithful, loyal servants who would be obedient to Him
though they lost wealth, honor, or even a kingdom for His sake?”
Our High Calling 193

Teaching Nature to Your Children

“Parents should be the only teachers of their children until they have reached eight or ten years of age.

As fast as their minds can comprehend it,
the parents should open before them
God’s great book of nature.

The mother should have less love
for the artificial in her house
and in the preparation of her dress for display,
and should take time to cultivate,
in herself and in her children,
a love for the beautiful buds and opening flowers.

By calling the attention of her children
to the different colors and variety of forms,
she can make them acquainted with God,
who made all the beautiful things
which attract and delight them.

She can lead their minds up to their Creator,
and awaken in their young hearts a love
for their heavenly Father,
who has manifested so great love for them.

Parents can associate God with all His created works.”

Counsels to Teachers 79-80
